

100 TON 2-POST PRESS EXAMPLE

EXAMPLE #285

Tonnage Capacity: 100

Type: Embossing

Industry: Sheet Metal Fabricator

Special Features: Off-Center Loading

FEATURES

- Designed for off-center loading of an embossing press for a leading sheet metal fabricator
- 2.5" x 24" x 57.3" bolsters
- 16" stroke Parker Cylinders
- Ram speeds: 70 IPM approach; 10 IPM pressing; 97 IPM return
- Hydraulic power system with 40 gallon oil reservoir
- 31" tall ram slide bushings, instead of Beckwood's standard oversized 18" dimensions, for superior bed to ram parallelism
- Parallelism control for side to side ram correction
- Light curtain guards the front opening of the press
- Bolt on expanded metal guards cover rear & left side openings of the press
- Right side of the press is blocked by structural member for added rigidity
- Two hand touch button controls
- Inch and semi-auto cycle controls
- Allen Bradley Micrologic 1200 PLC control
